WHAT IS STIVARGA® (regorafenib)?

STIVARGA is a prescription medicine used to treat people with:

- colon or rectal cancer that has spread to other parts of the body and for which they have received previous treatment with certain chemotherapy medicines

- a rare stomach, bowel or esophagus cancer called GIST (gastrointestinal stromal tumor) that cannot be treated with surgery or that has spread to other parts of the body and for which they have received previous treatment with certain medicines

- a type of liver cancer called hepatocellular carcinoma (HCC) in people who have been previously treated with sorafenib

It is not known if STIVARGA is safe and effective in children less than 18 years of age.
IMPORTANT SAFETY INFORMATION

STIVARGA® (regorafenib) can cause liver problems, which can be serious and sometimes lead to death. Your healthcare provider will do blood tests to check your liver function before you start taking STIVARGA and during your treatment with STIVARGA to check for liver problems. Tell your healthcare provider right away if you experience yellowing of your skin or the white part of your eyes, nausea, vomiting, dark urine, or change in your sleep pattern.

Before taking STIVARGA, tell your healthcare provider about all of your medical conditions, including if you:

- have liver problems in addition to liver cancer
- have bleeding problems
- have high blood pressure
- have heart problems or chest pain
- plan to have surgery or have had a recent surgery. You should stop taking STIVARGA at least 2 weeks before planned surgery
- are pregnant or plan to become pregnant. STIVARGA can harm your unborn baby. Females and males should use effective birth control during treatment with STIVARGA and for 2 months after their last dose of STIVARGA. Tell your healthcare provider right away if you or your partner becomes pregnant either while taking STIVARGA or within 2 months after your last dose of STIVARGA
- are breastfeeding or plan to breastfeed. It is not known if STIVARGA passes into your breast milk. Do not breastfeed during treatment with STIVARGA and for 2 weeks after your final dose of STIVARGA

Please see additional Important Safety Information on page 4 and enclosed full Prescribing Information, including the Boxed Warning.
Tell your healthcare provider about all the prescription and over-the-counter medicines, vitamins, and herbal supplements you take. Avoid drinking grapefruit juice and taking St John’s wort while taking STIVARGA® (regorafenib).

STIVARGA MAY CAUSE SERIOUS SIDE EFFECTS, INCLUDING:

- **infection** STIVARGA may lead to a higher risk of infections, especially of the urinary tract, nose, throat, and lung. STIVARGA may lead to a higher risk of fungal infections of the mucous membrane, skin or the body. Tell your healthcare provider right away if you get fever, severe cough with or without an increase in mucus (sputum) production, severe sore throat, shortness of breath, burning or pain when urinating, unusual vaginal discharge or irritation, redness, swelling or pain in any part of the body.

- **severe bleeding** STIVARGA can cause bleeding, which can be serious and sometimes lead to death. Tell your healthcare provider if you have any signs of bleeding while taking STIVARGA, including: vomiting blood or if your vomit looks like coffee grounds, pink or brown urine, red or black (looks like tar) stools, coughing up blood or blood clots, menstrual bleeding that is heavier than normal, unusual vaginal bleeding, nose bleeds that happen often, bruising, and lightheadedness.

- **a tear in your stomach or intestinal wall (bowel perforation)** STIVARGA may cause a tear in your stomach or intestinal wall that can be serious and sometimes lead to death. Contact your healthcare provider immediately if you notice severe pains or swelling in your stomach area (abdomen), fever, chills, nausea, vomiting, or dehydration.
STIVARGA MAY CAUSE SERIOUS SIDE EFFECTS, INCLUDING (CONTINUED):

- **a skin problem called hand-foot skin reaction (HSFR) and severe skin rash** Hand-foot skin reactions are common and sometimes can be severe. Tell your healthcare provider right away if you get redness, pain, blisters, bleeding, or swelling on the palms of your hands and soles of your feet, or a severe rash.

- **high blood pressure** Your blood pressure should be checked every week for the first 6 weeks after starting STIVARGA® (regorafenib). Your blood pressure should be checked regularly, and any high blood pressure should be treated while you are receiving STIVARGA. Tell your healthcare provider if you have severe headaches, light-headedness, or changes in your vision.

- **decreased blood flow to the heart and heart attack** Get emergency help if you have chest pain, have shortness of breath, feel dizzy, or feel like passing out.

- **a condition called reversible posterior leukoencephalopathy syndrome (RPLS)** Call your healthcare provider right away if you get severe headaches, seizure, confusion, change in vision, or problems thinking.

- **risk of wound healing problems** Wounds may not heal properly during STIVARGA treatment. Tell your healthcare provider if you plan to have any surgery before starting or during treatment with STIVARGA.
  - You should stop taking STIVARGA at least 2 weeks before planned surgery.
  - Your healthcare provider should tell you when you may start taking STIVARGA again after surgery.
The most common side effects with STIVARGA include pain, including stomach-area (abdomen); tiredness, weakness, fatigue; diarrhea (frequent or loose bowel movements); decreased appetite; infection; voice change or hoarseness; increase in certain liver function tests; fever; swelling, pain, and redness of the lining in your mouth, throat, stomach, and bowel (mucositis); and weight loss.

WHAT IS THE MOST IMPORTANT INFORMATION I SHOULD KNOW ABOUT STIVARGA® (regorafenib)?

STIVARGA can cause serious side effects, including liver problems.

STIVARGA can cause liver problems, which can be serious and sometimes lead to death. Your healthcare provider will do blood tests to check your liver function before you start taking STIVARGA and during your treatment with STIVARGA to check for liver problems.

Tell your healthcare provider right away if you get any of these symptoms of liver problems during treatment:

- yellowing of your skin or the white part of your eyes (jaundice)
- nausea or vomiting
- dark “tea-colored” urine
- change in sleep pattern
HOW MIGHT STIVARGA® (regorafenib) WORK DIFFERENTLY AS A MULTIKINASE INHIBITOR?

STIVARGA is a systemic therapy that works throughout your body to help fight certain cancers. STIVARGA, a multikinase inhibitor, may work by blocking some proteins on certain normal and cancer cells. In this way, STIVARGA may prevent cancers from developing and spreading for a period of time.

Cancer involves the uncontrolled growth of certain cells in the body.

STIVARGA may hinder the signals that tell cancer cells to multiply, and may slow the cancer from spreading to other parts of the body.

STIVARGA may also stop the creation of new blood vessels that feed cancer cells.
WHAT SHOULD I TELL MY HEALTHCARE PROVIDER BEFORE TAKING STIVARGA® (regorafenib)?

Before taking STIVARGA, tell your healthcare provider about all of your medical conditions, including if you:

- have liver problems in addition to liver cancer
- have bleeding problems
- have high blood pressure
- have heart problems or chest pain
- plan to have surgery or have had a recent surgery. You should stop taking STIVARGA at least 2 weeks before planned surgery
- are pregnant or plan to become pregnant. STIVARGA can harm your unborn baby. Females and males with female partners who can become pregnant should use effective birth control during treatment with STIVARGA and for 2 months after their last dose of STIVARGA. Tell your healthcare provider right away if you or your partner becomes pregnant either while taking STIVARGA or within 2 months after your last dose of STIVARGA
- are breastfeeding or plan to breastfeed. It is not known if STIVARGA passes into your breast milk. Do not breastfeed during treatment with STIVARGA and for 2 weeks after your final dose of STIVARGA

Tell your doctor or nurse about all the medicines you take, including prescription and over-the-counter medicines, vitamins, and herbal supplements. STIVARGA may affect the way other medicines work, and other medicines may affect how STIVARGA works.

Please see Important Safety Information on pages 2-4 and enclosed full Prescribing Information, including the Boxed Warning.
KEEP A LIST OF ALL YOUR MEDICINES AND TELL YOUR DOCTOR OR NURSE ABOUT THEM

This should include all prescription and over-the-counter medicines, vitamins, and herbal supplements. STIVARGA® (regorafenib) may affect the way other medicines work, and other medicines may affect how STIVARGA works. Avoid drinking grapefruit juice or taking St John’s Wort while taking STIVARGA.

LIST OF MEDICINES, VITAMINS, AND SUPPLEMENTS
COMMUNICATE WITH YOUR DOCTOR OR NURSE

Now that you’re ready to start using your Treatment Journal, remember:

- **CONTACT YOUR DOCTOR OR NURSE** as soon as you receive your STIVARGA® (regorafenib) to schedule your first appointment within the first week. It’s important to STAY IN TOUCH with your doctor or nurse, especially during the first week of treatment.

- **CHECK YOUR BLOOD PRESSURE EVERY WEEK** for the first 6 weeks after starting STIVARGA and then every cycle, or more frequently, based on what your doctor tells you to do. Always tell your doctor or nurse if you have **SEVERE HEADACHES, LIGHTHEADEDNESS, OR CHANGES IN VISION**.

- **YOUR DOCTOR OR NURSE WILL DO BLOOD TESTS** to check your liver function before you start taking STIVARGA, as well as during your treatment with STIVARGA, to check for liver problems.

- **CALL YOUR DOCTOR OR NURSE** as soon as you suspect a potential side effect. Your doctor or nurse can help you manage side effects, for example, by lowering your dose or temporarily stopping treatment—if you experience serious side effects or continue to experience side effects, your doctor may permanently stop treatment.
HOW DO I STORE STIVARGA®
(regorafenib) TABLETS?

✔ Keep STIVARGA in its ORIGINAL BOTTLE, as it contains a special drying agent (called a desiccant) to keep your medicine dry. Do not put the tablets in a daily or weekly pill bottle.

✔ You will need to remove the drying agent to get tablets from the bottle. PUT IT BACK IN THE ORIGINAL BOTTLE after getting your medicine.

✔ Keep the bottle of STIVARGA TIGHTLY CLOSED and store at room temperature.

✔ STIVARGA boxes contain 3 bottles, one for each week of your treatment cycle. Open only 1 BOTTLE AT A TIME.

✔ Any unused STIVARGA tablets should be SAFELY THROWN AWAY 7 weeks after opening the bottle.

✔ Keep STIVARGA and all medicines OUT OF THE REACH OF CHILDREN.

Please see Important Safety Information on pages 2-4 and enclosed full Prescribing Information, including the Boxed Warning.
HOW DO I TAKE STIVARGA® (regorafenib) TABLETS?

Take STIVARGA exactly as your doctor or nurse tells you. Your doctor or nurse may change your dose or stop your treatment to manage side effects.

**ONCE-DAILY DOSING SCHEDULE**

The standard dose of STIVARGA is: **160 mg/day** (four 40-mg tablets)

Take four 40-mg pills once a day for 21 days, and then take 1 week off

Repeat this cycle for as long as your healthcare provider tells you to.
ABOUT DOSING

Take STIVARGA® (regorafenib) at the SAME TIME every day

Swallow STIVARGA tablets whole with water

Take STIVARGA after a low-fat meal of <600 calories and <30% fat

✔ Be sure you UNDERSTAND YOUR DAILY DOSE (number of tablets each day) that your doctor or nurse has prescribed for you and follow his or her directions for your treatment

✔ If you miss a dose, TAKE IT AS SOON AS YOU REMEMBER ON THE SAME DAY. Tell your doctor or nurse about any missed doses

✔ DO NOT TAKE 2 DOSES ON THE SAME DAY to make up for a missed dose

✔ AVOID DRINKING GRAPEFRUIT JUICE OR TAKING ST JOHN’S WORT while taking STIVARGA. These can affect the way STIVARGA works

✔ If you take too much STIVARGA, CALL YOUR HEALTHCARE PROVIDER or go to the nearest emergency room right away

Your doctor or nurse may do blood tests before each cycle of treatment.
YOUR DOCTOR OR NURSE MAY CHANGE YOUR DOSE OR STOP YOUR TREATMENT TO MANAGE SIDE EFFECTS

- Changing your dose or interrupting your treatment for a while is not unusual, and it may help manage the side effects of your STIVARGA® (regorafenib) treatment
- If you experience certain side effects, your doctor or nurse may change your dose or interrupt or stop your treatment permanently
- Always share your questions and concerns with your doctor or nurse

Call your doctor or nurse or go to the nearest emergency room right away if you take more than your prescribed dose by mistake.

If you have side effects with STIVARGA, tell your doctor or nurse right away.
HELPING YOU PLAN YOUR LOW-FAT MEALS

STIVARGA® (regorafenib) should be taken with water at the same time each day after a low-fat meal containing <600 calories and <30% fat. The following sample meals are provided as a guide to help you understand what types of food would be considered part of a low-fat meal when taking your medication. Discuss with your doctor what other types of food you should eat throughout the day.

IF YOU TAKE STIVARGA® (regorafenib) AFTER BREAKFAST

Sample Breakfast 1
- Bran Flakes Cereal (1/4 cup)
- 1% Milk (1 cup)
- Toasted White Bread (1 slice)
- Fat-Free Butter (1 tbsp)
- Orange Juice (8 oz)

Sample Breakfast 2
- Instant Oatmeal Maple & Brown Sugar (1 package, prepared with water)
- 1 Medium-Sized Banana (8”)
- Whole Wheat Bread (1 slice)
- Fat-Free Butter (1 tbsp)
- Jam or Preserves (1 tbsp)
- Coffee (instant served with skim milk)

Sample Breakfast 3
- 1% Low-Fat Cottage Cheese (4 oz)
- English Muffin (1)
- Fat-Free Butter (1 tbsp)
- Jam or Preserves (1 tbsp)
- Apple Juice (8 oz)

Total Calories: 383
Total Fat: 10.1%

Total Calories: 411
Total Fat: 8.3%

Total Calories: 379
Total Fat: 5.9%

IF YOU TAKE STIVARGA® (regorafenib) AFTER LUNCH

Sample Lunch 1
- Turkey Breast Lunch Meat (2 slices)
- Toasted White Bread (2 slices)
- Mayonnaise (1 tbsp)
- Lettuce and Tomato (1 leaf/slice)
- 1 Large Apple (4”)
- Cranberry Juice (8 oz)

Sample Lunch 2
- Light Tuna Fish (canned in water)
- Lettuce (1/2 cup Romaine, shredded)
- Whole Wheat Bread (1 slice)
- Crunchy Granola Bar (2 oat & honey bars)
- Tea (8 oz)

Sample Lunch 3
- Extra-Lean Sliced Ham (2 slices)
- English Muffin (1)
- Egg Substitute (1 cup, cooked in a pat of butter)
- Carrot Sticks (4 oz)
- Water (8 oz)

Total Calories: 496
Total Fat: 23.6%

Total Calories: 457

- Tell your healthcare provider if you have severe headaches, lightheadedness, or changes in your vision |
| Decreased blood flow to the heart and heart attack                          | - Get emergency help right away and call your healthcare provider if you get symptoms such as:  
  - chest pain  
  - shortness of breath  
  - feel dizzy or feel like passing out |
| A condition called reversible posterior leukoencephalopathy syndrome (RPLS)| - Call your healthcare provider right away if you get:  
  - severe headaches  
  - seizure  
  - confusion  
  - change in vision  
  - problems thinking |
THE MOST SERIOUS SIDE EFFECTS WITH STIVARGA® (REGORAFENIB) ARE:

**Risk of Wound Healing Problems**
- Wounds may not heal properly during STIVARGA treatment. Tell your healthcare provider if you plan to have any surgery before starting or during treatment with STIVARGA.
  - You should stop taking STIVARGA at least 2 weeks before any planned surgery.
  - Your healthcare provider should tell you when you may start taking STIVARGA again after surgery.

THE MOST COMMON SIDE EFFECTS WITH STIVARGA INCLUDE:
- pain, including stomach-area (abdomen)
- tiredness, weakness, fatigue
- frequent or loose bowel movements (diarrhea)
- decreased appetite
- infection
- voice changes or hoarseness
- increase in certain liver function tests
- fever
- swelling, pain, and redness of the lining in your mouth, throat, stomach, and bowel (mucositis)
- weight loss

Tell your doctor or nurse if you have any side effect that bothers you or that does not go away.

These are not all the side effects of STIVARGA. Please see the enclosed full Prescribing Information to learn more.
INFORMATION ABOUT SOME POSSIBLE SIDE EFFECTS OF STIVARGA® (regorafenib)

HFSR: What you can do about it

HFSR is a common side effect of treatment with STIVARGA. You may not recognize that you have HFSR if you don’t know what to look for. That’s why it is important to catch symptoms early on—and let your treatment team know about them.

Tell your doctor or nurse right away if you have even mild symptoms of these skin changes, as they could be signs of HFSR.

Changes in skin:

- Sensation
  - Numbness, burning, tingling, or “pins and needles” feelings
- Sensitivity
  - Increased sensitivity or sensitivity to hot objects
- Appearance
  - Redness or swelling
- Texture
  - Calluses (hard layers of skin) on the palms of hands or balls/soles of feet, blisters, dry or cracked skin, or flaking or peeling skin
TELL YOUR TEAM

Tell your treatment team right away if you have signs of HFSR on your hands or feet. They will determine how severe your symptoms are and can work with you to help manage them either by reducing your dose, temporarily discontinuing, or permanently discontinuing STIVARGA® (regorafenib).

Rash is different from HFSR

You may notice a rash on your face or body when taking STIVARGA. Rash is different from HFSR, because it does not give you calluses on your feet or hands. A rash can be reddish, itchy, or tender. It can also include small blister-like bumps. If you have rash, talk with your doctor/nurse. You may need to see a dermatologist (skin doctor).

It is important to stay in regular contact with your doctor or nurse so you can catch symptoms early.
CARE FOR HFSR

When thinking about HFSR, remember to “CARE”.

To manage HFSR, your healthcare provider may change your dose, interrupt your treatment, or stop your treatment permanently.

Check for and treat any new calluses

Inspect your skin regularly.

You can soak your feet weekly for 20-30 minutes in Epsom salts (magnesium sulfate). After soaking, gently pumice any callused skin.

Thick calluses require a consult with a podiatrist.

Add cushioning

(Such as gloves or handle grips) when doing activities that increase pressure on hands. This includes cooking, gardening, sports, and home repair.

Relieve pressure on feet

By wearing comfortable, well-padded shoes and loosening laces.

Exfoliate and moisturize skin

To keep it soft and well-hydrated.
INFORMATION ABOUT SOME POSSIBLE SIDE EFFECTS OF STIVARGA® (regorafenib)

TIREDNESS: What you can do

Feeling tired is common when you have cancer. STIVARGA may also make you feel tired.

If you are feeling tired, try “REST”:

✔ REPRIORITIZE DAILY TASKS to do your most important ones when you have the most energy; don’t worry about doing less important things if you are tired

✔ EXERCISE LIGHTLY OR REMAIN ACTIVE. Follow your doctor’s guidelines for activity

✔ STAY AWARE DURING THE DAY, so you can sleep well at night

✔ TAKE TIME WITH FRIENDS AND FOR ACTIVITIES YOU ENJOY—like listening to music or reading
DIARRHEA: What you can do

STIVARGA® (regorafenib) may cause diarrhea. If you get diarrhea, tell your doctor/nurse right away. You might need treatment to replace important fluids in your body or to keep you from losing too much weight.

Following these tips can help treat diarrhea:

✔ **EAT** several small meals each day instead of 2 or 3 large ones
  – Try bland foods, like bananas, rice, applesauce, and toast

✔ **DRINK** plenty of water, but stay away from hot or iced drinks

✔ **STAY AWAY** from spicy foods, dairy products, caffeine, and alcohol

✔ **TAKE DIARRHEA MEDICINE AS DIRECTED** by your doctor/nurse
MANAGING YOUR TREATMENT

STIVARGA® (regorafenib) may cause side effects. It’s important that you talk to your doctor or nurse as soon as you notice any side effects. You should write down when you first notice the side effects, so you can remember to tell your doctor or nurse at your next appointment. Use this treatment journal to help you remember the details of any side effects you may experience during treatment with STIVARGA.

NOTE: When describing how the medication is making you feel, always remember to circle the number of STIVARGA tablets you took that day.
NOTES
WHAT IS A TREATMENT JOURNAL?

This treatment journal is a place for you to record:

- How you are feeling
- How you are managing your treatment
- How many tablets you are taking each day
- Your skin condition, blood pressure, and any side effects you may experience

This journal will help you and your doctor or nurse throughout your treatment. Keep track of how much medicine you are taking and how it is making you feel. All of this information helps your doctor or nurse decide if your dose of STIVARGA® (regorafenib) should be reduced or if your treatment should be interrupted or stopped permanently. Some examples of how to fill out your daily journal are on pages 32 and 33.
HOW TO COMPLETE YOUR TREATMENT JOURNAL

As soon as you take your first STIVARGA® (regorafenib) dose, it is important for you to keep a daily journal.

- Mark how many tablets you took each day by circling them and indicating the time that you took them.
- If your doctor or nurse instructed you not to take any tablets, circle the ☐. You will also circle ☐ if you missed a dose, if your doctor or nurse interrupted your therapy, or if you are on your 4th week of treatment (your “take a break” week).
- Jot down how you are feeling and any skin care notes, including if you used any topical creams.
- Your blood pressure should be checked every week for the first 6 weeks of treatment and then every cycle, or more frequently, based on what your doctor tells you to do. Write down your blood pressure every time it is checked.
- It is also important to make note of the date you opened each bottle.
- If you cannot fill out your journal you can have a family member or caregiver help you. Be sure to bring your journal to each appointment with your doctor or nurse. On the next page are some examples of how to fill out your journal for a single day.

Please see Important Safety Information on pages 2-4 and enclosed full Prescribing Information, including the Boxed Warning.

**Weekly Notes and Questions for My Doctor or Nurse**

Date bottle opened: MM DD YY

Blood pressure: How many tablets did you take today?
YOUR SPECIALTY PHARMACY IS HERE TO HELP!

Now that you have started on STIVARGA, you can rely on your specialty pharmacy for continued support and coordination with your doctor. A nurse from the network specialty pharmacies will be calling you soon.

The nurse is available to help answer your questions and assist you with the following:

- Potential side effects
- Medication questions
- Assist with reimbursement
- Provide ongoing communication throughout your treatment
- Provide refill assistance

REMEMBER:

Your specialty pharmacy nurse is here to help and discussions with them are confidential and do not impact prescription coverage. Only your doctor can prescribe or make changes to your medication.

See page 42 for a list of specialty pharmacies within the STIVARGA network. A nurse from one of these pharmacies will be calling you soon to assist you.
STIVARGA SPECIALTY PHARMACY NETWORK

A nurse from one of the following specialty pharmacies will be calling you soon to assist you.

- AcariaHealth
- Cigna
- Accredo
- CVS
- Aetna Specialty
- Diplomat
- AllianceRx
  Walgreens Prime

- Humana
- Avella
- Onco360
- Biologics
- US Bioservices
- BriovaRx

Specialty pharmacies offer a variety of services and a higher level of comprehensive and coordinated care. Your specialty pharmacy is also responsible for delivery of your medication through the mail. Your insurance requires the specialty pharmacy to speak with you before dispensing your medication and your verbal authorization for dispensing needs to occur in a timely manner. Remember, only your physician can make changes to your medication.
HELPING YOU GET AND PAY FOR YOUR MEDICATION

$0 co-pay for privately insured patients

- NO monthly cap
- Covers 100% of co-pays up to $25,000 per year per patient
- Patients cannot participate if:
  - Prohibited by their insurance company or applicable laws
  - Enrolled in any type of government insurance or reimbursement program
- If prior authorization determinations are delayed or denied, patients will be assessed for temporary patient assistance

3 WAYS TO ENROLL IN $0 CO-PAY

1. Directly via www.zerocopaysupport.com or call 1-866-581-4992

2. REACH 1-866-639-2827

3. Specialty Pharmacy Provider (SPP) Network
ADDITIONAL PATIENT EDUCATION AND SUPPORT

NURSE COUNSELORS—a resource in patient education and support

- Answering questions, providing information, and offering patient assistance
- Education on potential adverse events
- Patient educational materials/starter kits
- Refill reminders
- Outbound calls

FINANCIAL SUPPORT COUNSELORS—a resource in assisting with patient access

- Benefit verification, identification, and coordination of SPP
- $0 co-pay assistance for privately insured patients*
- Alternative coverage research—referral to independent organizations that may assist qualified patients with their out-of-pocket expenses†

For more information, REACH us by phone: 1-866-639-2827
Nurse services: 10AM-6PM EST/EDT—Patient services: 9AM-5PM EST/EDT

*Patients who are enrolled in any type of government insurance or reimbursement programs are not eligible. As a condition precedent of the co-payment support provided under this program, e.g., co-pay refunds, participating patients and pharmacies are obligated to inform insurance companies and third-party payors of any benefits they receive and the value of this program, and may not participate if this program is prohibited by or conflicts with their private insurance policy, as required by contract or otherwise. Void where prohibited by law, taxed, or restricted. Patients enrolled in Bayer’s Patient Assistance Program are not eligible. Bayer may determine eligibility, monitor participation, equitably distribute product and modify or discontinue any aspect of the REACH program at any time, including but not limited to this commercial co-pay assistance program.

†Patients do not automatically qualify for financial help from charitable organizations; eligibility rules apply.
3 WAYS TO GET STIVARGA

Because STIVARGA is a specialized anticancer medicine, it is not available at retail pharmacies. You can get your medicine in 3 easy ways:

1. **Specialty Pharmacy Provider (SPP) Network**
   - When filing a prescription through an SPP, you will likely receive your medicine through the mail
   - **SPP employees:**
     - Work directly with your oncology team and health insurance providers to coordinate your care
     - Will assist with delivery/payment details and support programs

2. **REACH®**
   - The Resources for Expert Assistance and Care Helpline (REACH) provides nursing support, financial assistance, and help with taking STIVARGA
   - Contact a REACH counselor at 1-866-639-2827

3. **DOCTOR’S OFFICE**
   - You may receive your medicine at a doctor’s office if an on-site pharmacy is available
